

Bellows-Sealed Metering Valves

MU Series

Introduction

MU Series Bellows-Sealed Metering Valves are precise flow controllers suitable for high purity and ultra high purity applications. The vernier handle allows for precise flow adjustment, while the precision metal bellows ensure stable flow. The all-metal flow path design is both corrosion-resistant and high-temperature resistant. Available with metering and regulating stem tips, these stem tips are easy to replace.

Features

- Reset spring design with no backlash for precise, repeatable flow settings
- Micrometer handle measures stem position in 0.0008 in. (0.02 mm) increments
- Valves open to maximum flow in six turns
- Metering and regulating stem tips available
- Modular design to reduce maintenance cost
- Slotted handle tops enable adjustment with a screwdriver
- Lock screw secures flow settings

Factory Flow Settings

For valves with metering stem tips, with 10 psig (0.68 bar) inlet pressure and the flow rate from 10 to 15 ml/min, the handle is set at 0 and the valves are not intended for shut-off service.

For valves with regulating stem tips, when valves are closed, after helium leak tested to a maximum allowable leak rate of 7×10^{-7} std cm³/s, the handle is set at 0.

Note: Valves with regulating stem tips and welded seal are not recommended for shut-off service above 600 °F (315 °C).
