## Options

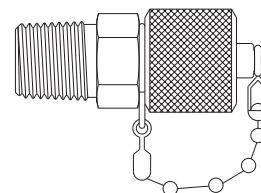

### 1. Check Valve

Adapter with check valve seals via the o-ring and probe. When the hose probe is pushed into the o-ring, the probe in the adapter opens the check valve and allows flow.

### 2. Protective Cap

Protective cap guards against damage and contaminants when adapters are uncoupled. Protective caps are not pressure containing devices.

## Ordering Information

Add the material designator as a prefix to the basic ordering number. To get a valve or/and protective cap, add **-V** or **-PC/-V-PC** as a suffix to the basic ordering number.

Example: 1/4 Male NPT as end 1, 1/2" Male UNF as end 2, 304 stainless steel, a valve and a protective cap added, the complete ordering number is: **S4-QT-NS4-ST-V-PC**.

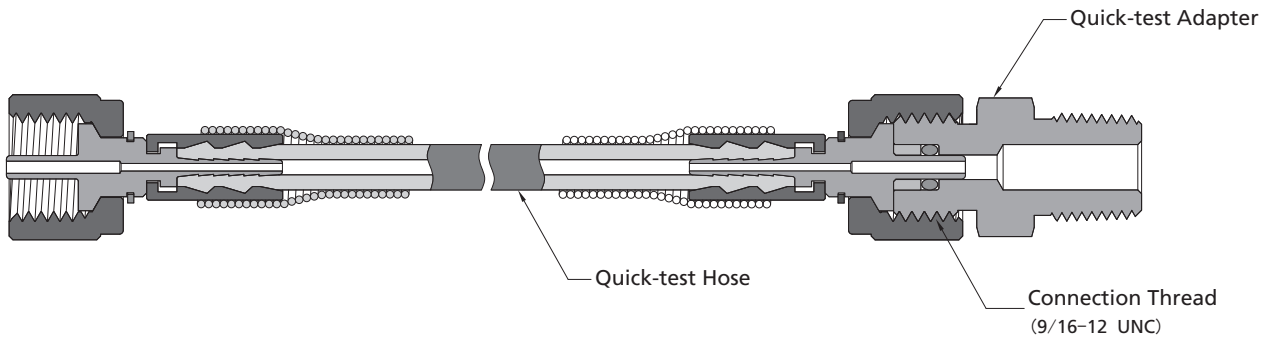

1. *XT* means 1/2-20 UNF Male thread, *FXT* means UNF Female thread UNC thread.
2. Sizes and types listed are standard, other sizes and types are available upon request.
3. Dimensions are for reference only and are subject to change.
