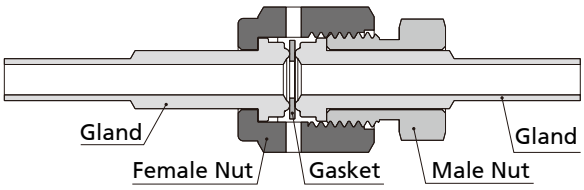
Ordering Information

◎ Each component can be ordered separately.
◎ Add the material designator as a prefix, cleaning and packaging designator as a suffix to the basic ordering number to get the complete ordering number.
◎ Cleaning and Packaging
a. Standard Cleaning and Packaging Process (FC-01) for general industrial procedures. No suffix is needed.
b. Special Cleaning and Packaging Process (FC-02), to ensure compliance with product cleanliness requirement as stated in ASTM G93 Level C. Add "-F2" as a suffix when needed.
c. Ultra High Purity Process (FC-03) is applied to products with wetted surface roughness finished to an average of Ra 5 μin. (0.13 μm). Add "-F3" as a suffix when needed.
Example: For 1/2" 316L SS VAR gland with Ultra High Purity Process (FC-03), the complete ordering number is 6LV-G-FR8-TB8-6-F3.

Installation Instructions

1. Assemble the gland, nut, gasket and male nut as below. Finger tight the nut.
2. For fittings with 316L SS and nickel gaskets, tighten the nut 1/8 turn with a wrench while holding the male nut or the fitting body steady. Tighten the nut 1/4 turn for those with copper gaskets.



Cautions

◎ Dimensions are for reference only and are subject to change
◎ Over-tightening will damage the sealing beads and lead to possible leak
◎ Utilize a new gasket for each assembly
◎ Tungsten Inert Gas Welding (TIG) is recommended
◎ Always apply sealing materials compatible with the fluid on tapered pipe threads
◎ Do not loosen or tighten fittings when the system is pressurized
◎ Integral FR fittings must remain stationary during installation. Integral male FR fittings should not be paired with integral female FR fittings. Instead, they should be used in conjunction with rotating nuts and glands

	Gasket	PTFE	T	N/A	T	-50 °F to 450 °F (-45 °C to 232 °C)

The Male SAE/MS port uses a fluorocarbon FKM O-ring (90 durometer) by default, with an overall designator of VI9.
For O-ring made from other materials, please contact FITOK.
The FO port uses a Fluorocarbon FKM (70 durometer) O-ring by default, with an overall designator of VI7. Various other materials are available, as shown in the table above. For O-ring in materials not listed, please contact FITOK.
