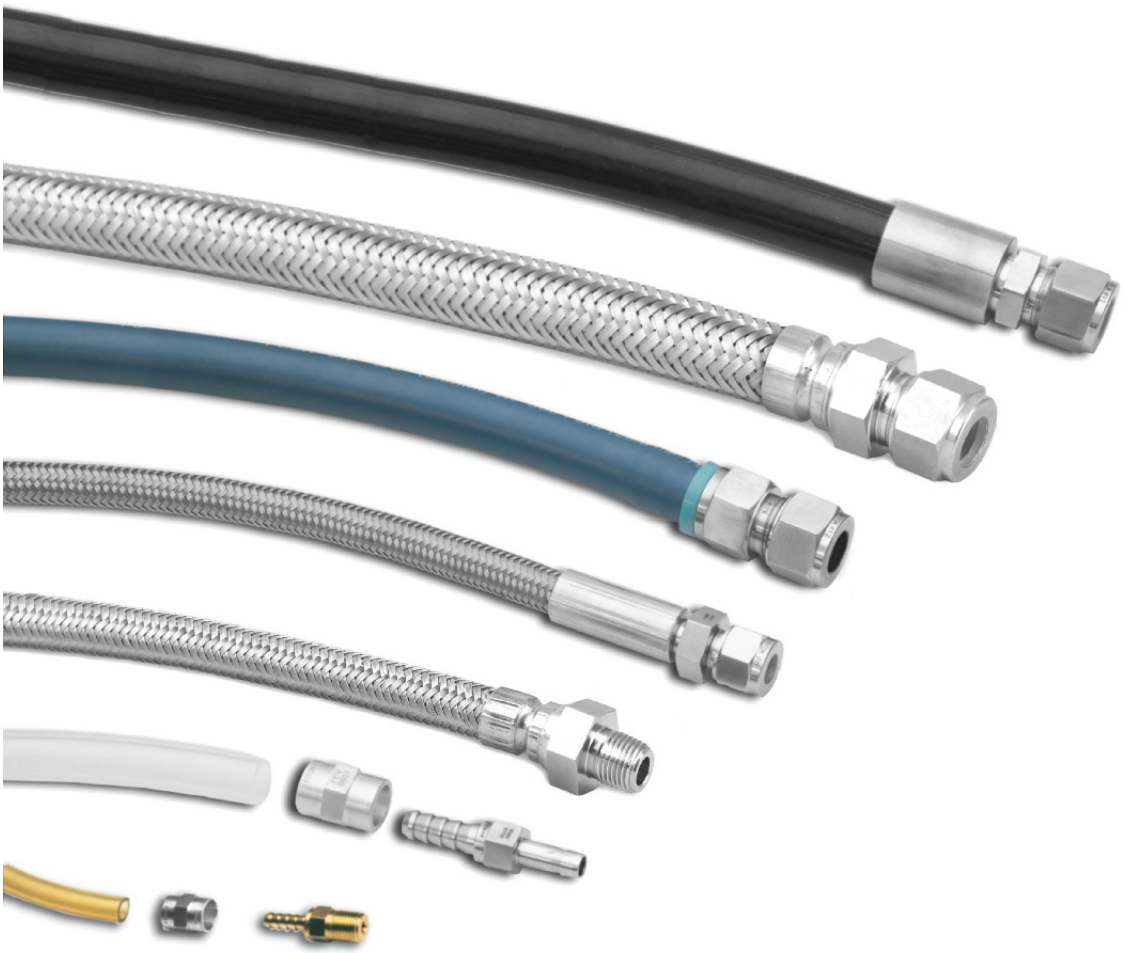
Hoses and Connectors

MH, MM, PS, MP, TH and HC Series



FITOK

Contents

Terms and Definitions

Hose

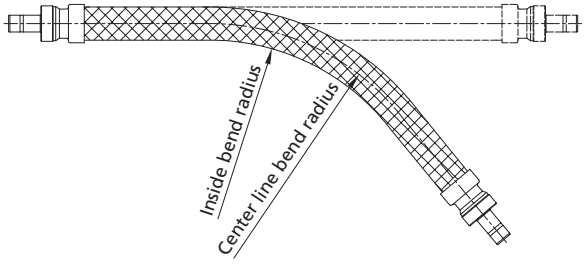
A multiple-layered flexible conduit through which fluid is conveyed from one point to another.

Nominal Hose Size

An approximation of the hose inside diameter.

Bend Radius

The radius of the bent section of a hose, measured to the center line or inside of the curved section.



End Connection

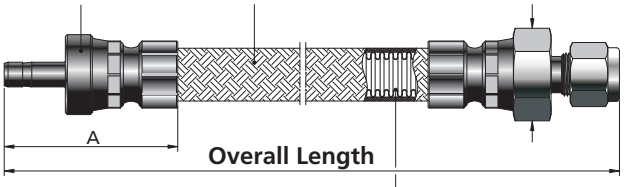
The fitting that is assembled onto each end of the hose to provide a means of installation into a fluid system.

Overbraid

A flexible, woven reinforcement.

Maximum Outside Dimension

The largest nominal outside dimension of the hose assembly.



Spring Guard

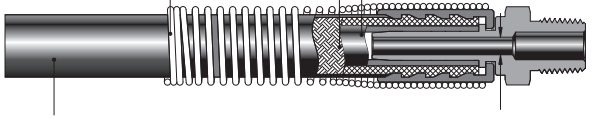
A helical metal spring used to protect the hose from abrasion overbending, and kinking.

Reinforce-ment

Material used to reinforce the core and increase its pressure-containing capacity.

Core

The hose's innermost material that comes into contact with the system media, often referred to as the wetted surface.



Cover

The hose's outermost material, used to protect the reinforcement and core from environmental conditions and wear.

Minimum Inside Diameter

The smallest inside diameter of inner flow path of the hose assembly.

Minimum Dynamic Bend Radius

The smallest bend radius that a hose is allowed to perform in applications where the hose undergoes dynamic bending and position changes.

Minimum Static Bend Radius

The smallest bend radius that a hose is allowed to perform in applications where the hose is stationary without any movement in any plane.

Flexibility

The relative ease or difficulty of bending a non-pressurized hose assembly.

Burst Pressure

The pressure at which leakage occurs in a laboratory burst test.

Permeation

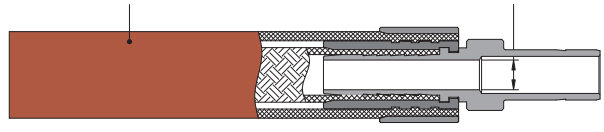
The movement of a liquid, gas, or vapor through a solid. All materials are permeable to a certain degree and must be tested for application compatibility before installation.

Fire Jacket

Woven fiberglass coated with specially compounded silicone rubber to provide insulation from internal system fluid temperature extremes.

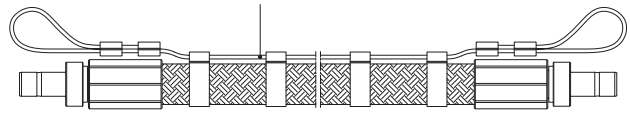
Minimum Inside Diameter

The smallest inside diameter of inner flow path of the hose assembly.



Safety Cable

Prevent hoses from whipping around and causing serious injuries in the event of fitting blow-off or hose burst. The knot at each end of cable can be adjusted before being secured to fixed point.



Considerations for Selecting a Hose Assembly Solution

Temperature

Identify the minimum and maximum temperatures the hose assembly will be exposed to in the system media and environment.

Pressure

Identify the minimum and maximum pressures (or vacuum) within and outside the hose assembly.

Material

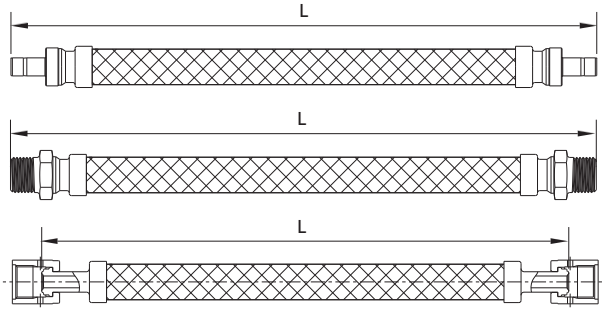
Identify the system media and the environment that the hose assembly will be exposed to. This will help determine the materials best suited to the application demands.

Movement

Confirm whether the hose assembly will be installed in dynamic applications as this will require differentconsiderations than a static application.

Length

Determine the most likely route for installation of the hose, use this to identify required length.
Note: Different types of hoses vary in measuring position. For hoses with pipe fittings, length loss due to threading into the mating fitting should be taken into account.



Cleanliness

Identify the cleanliness need.

End Connection

Identify the type of end connections that are most compatible with the system requirements. End connections differ in materials of construction and pressure ratings.

Orientation

Address space constraint concerns. Hose assemblies with elbows and union ball joints may help resolve space constraint issues.

Desired Flow

Consider desired flow. Hose connection size, core tube construction, and installation route may impact flow.

Additional Protection

Identify whether additional protection is necessary for the hose assemblies or surrounding systems.

Permeability

Nylon, PFA, polyethylene, PTFE, and rubber are permeable materials. Gases and vapors may migrate through cores of these materials. The permeation rate is affected by many factor variables.

Installation and Use Guide

⚠ Warning

Product failure or improper use may pose a threat to your personal safety and property.

Inspection

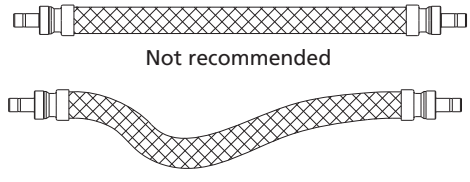
Inspect whether the hose length and layout are reasonable, and whether hose surface is free of defects and damage prior to installation. Establish an inspection schedule based on system application and replacement history.

Vibration

Evaluate the amount of system vibration when selecting a hose. Metal hose may not be appropriate for systems with constant or severe vibration.

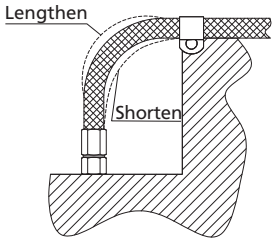
Length

Consider hose movement, system pressurization, and thermal expansion when identifying hose length. Installing hose that is not long enough to accommodate these factors may shorten hose life.



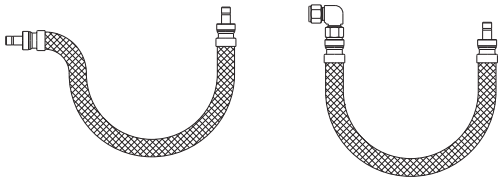
System Pressure Changes

Use sufficient hose length to accommodate system pressure changes. Do not connect high pressure hoses and low pressure hoses together.



Hose Strain

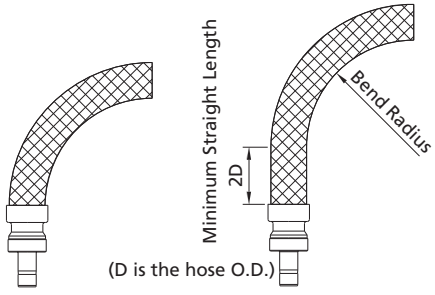
Elbows and adapters can be used to relieve hose strain.



Not recommended Recommended

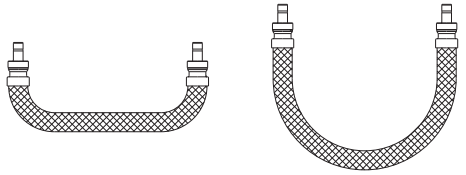
Minimum Bend Radius & Minimum Straight Length

Follow minimum bend radius requirements for your hose. Installing hose with smaller bends may kink hose and shorten hose life.



Not recommended Recommended

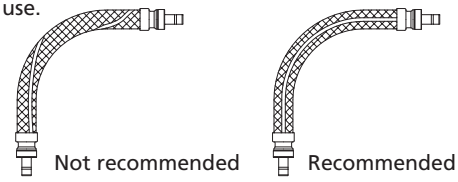
Maintain the minimum straight length for bent section, otherwise, hose rupture or leakage may result from bending too close to the hose/fitting connection.



Not recommended Recommended

Twist Avoidance

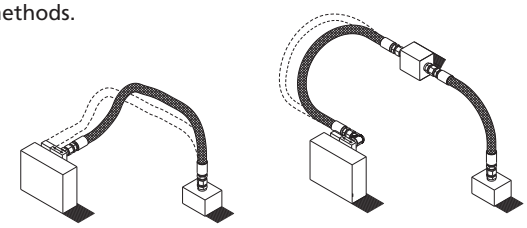
Avoid twisting the hose assembly and causing stress that may affect its use.



Not recommended Recommended

Bending in One Plane

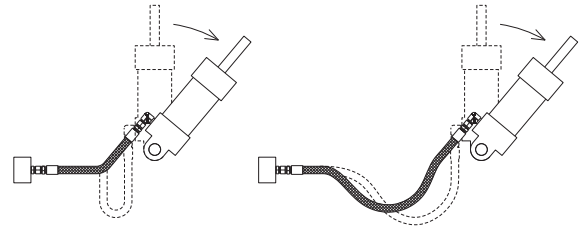
Bend the hose in one plane only so as to avoid twisting. For a compound bend, use multiple hose pieces or other isolation methods.



Not recommended Recommended

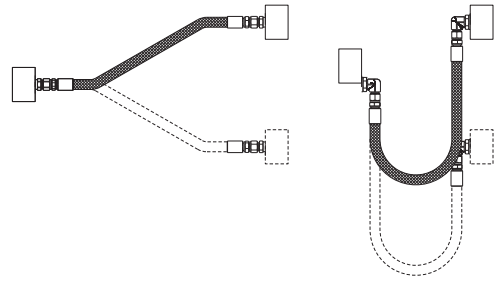
Motion Absorption

Distribute movement and prevent bends smaller than the hose's minimum bend radius by ensuring sufficient hose length.



Not recommended Recommended

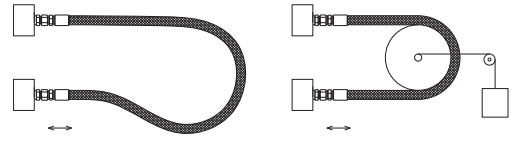
Elbow-connected hoses are better suited for vertical movement than hoses connected with straight fittings.



Not recommended Recommended

Necessary Limits and Protection Devices

Install necessary limits and protection devices to facilitate hose movement and avoid twisting.



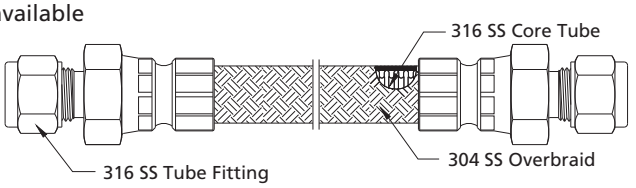
Not recommended Recommended

Metal Flexible Hoses

MH, MM Series

Features

- Core tube and fitting material: 316, 316L stainless steel
- Overbraid material: 304 stainless steel (316 SS available)
- Vacuum and positive pressure applications
- Working pressure up to: 3100 psig (213 bar)
- Nominal hose size: 1/4" to 2"
- End connections:
  1/4" to 2" pipe thread
  1/4" to 2" and 6 mm to 50 mm tube fitting
- Working temperature: -325°F to 800°F (-200°C to 426°C)
- Welded fitting-to-hose construction to ensure reliable seal
- Standard and custom length available



Hose Technical Parameters (MH Series)

Testing

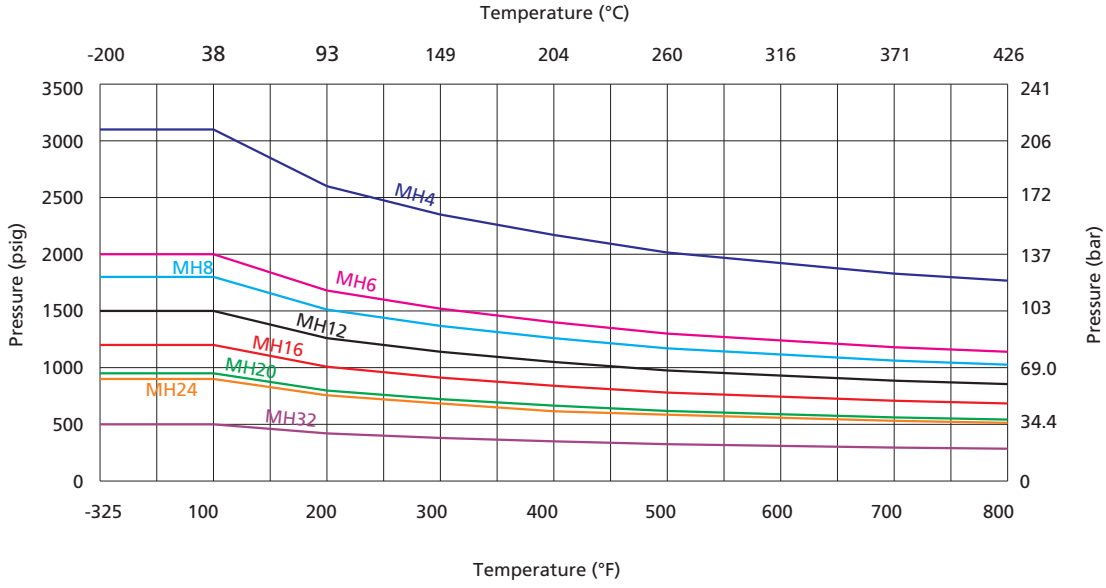
Every FITOK metal flexible hose is factory-tested with nitrogen or air at maximum working pressure and is subject to sampling test with helium to a maximum leak rate of 1×10^{-5} std cm^3/s before shipment . For other requirements, please contact FITOK Group or our authorized distributors.

Cleaning and Packaging

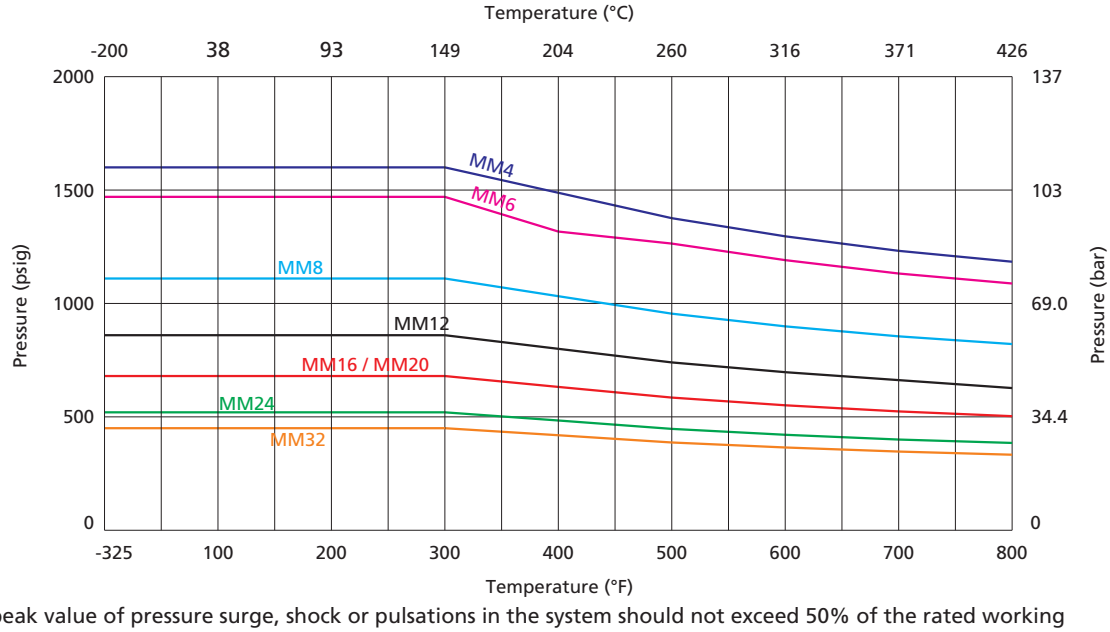
FITOK metal flexible hose components are cleaned in accordance with FITOK *Standard Cleaning and Packaging Process (FC-01)* for general industrial procedures.
Shorter hoses are packed in cartons with suitable protective material, longer hoses are coiled, bagged and boxed or crated.

Pressure vs. Temperature

MH series



MM series



The peak value of pressure surge, shock or pulsations in the system should not exceed 50% of the rated working pressure of the hose.

			SAN Female JIC 37° Flare Swivel						
			AN Male JIC 37° Flare						
			SFFR Female FR Fitting Swivel						
			SFR Male FR Fitting Swivel						
			OTB Tube Butt Weld Fitting						

① To order multiple options, please add designators in alphabetical order and separate them with dashes.

Note: "Ordering Number Description" is a reference to understand the combination rules of FITOK product part number. Not all combinations are available.

Example: SS-MH4-FT6-M710

SS: End connection material is 316 stainless steel.
MH4: MH series, nominal hose size is 1/4".
FT6: End connection 1 is 3/8" tube adapter.
End connection 2 is 3/8" tube adapter.
M710: Overall length is 710 mm.

Connections are described based on the following rules:
1. Metric Tube Fitting - Fractional Tube Fitting - Metric Tube Adapters - Fractional Tube Adapters - NPT Threads - BSPT Threads - BSPP Threads - SAE/MS Parallel Threads - 37° Flare - FR Fitting - OTB Tube Butt Weld Fitting - Others
2. Put the sizes from the biggest down to the smallest if they are of the same type.
3. Put the female before male if they are of the same type and size.

PTFE-lined, Stainless Steel Braided Hoses

PS Series

Features

- ◎ Lightweight construction for easy handling and installation
- ◎ Core tube material: smooth virgin PTFE
- ◎ Overbraid material: 304 stainless steel
- ◎ Working pressure up to: 3000 psig (207 bar)
- ◎ Nominal hose size: 1/8" to 1"
- ◎ Working temperature: -65°F to 400°F (-53°C to 204°C)
- ◎ Standard and custom length available

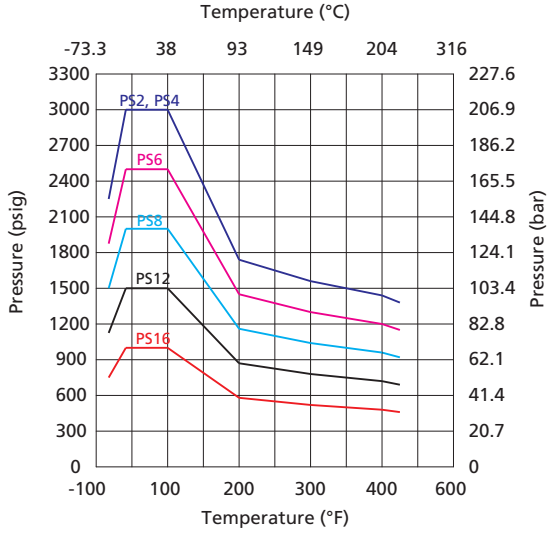
Pressure vs. Temperature



Testing

Every FITOK PTFE-lined hose assembly is factory tested with pure water at 1.5 times the maximum working pressure.

Cleaning and Packaging

FITOK PTFE-lined hose components are cleaned in accordance with FITOK *Standard Cleaning and Packaging Process (FC-01)* for general industrial procedures.
Shorter hoses are packed in cartons with suitable protective material, longer hoses are coiled, bagged and boxed or crated.

1. All dimensions are for reference only and are subject to change. For dimensions not shown above, please contact FITOK Group or our authorized distributors.

2. Sizes and types listed are standard. Other sizes and types are available on request.

Options

Anti-whip Cable

- 304 stainless steel cable
- Available on hoses without changing the technical parameters of hoses
- Prevent hoses from whipping around and causing serious injuries in the event of fitting blow-off or hose burst

Spring Guard

- 302 stainless steel material
- Available on hoses without changing the technical parameters of hoses
- Protect the hose from abrasion, overbending, and kinking

Fire Jacket

- Braided fiberglass coated with organic, high-temperature-resistant iron oxide red silicone rubber
- Offers excellent flame and fire protection and has good thermal and electrical insulation with resistance to acid & alkili
- Operating temperature from -65 to 500°F (-53 to 260°C) with max. short-term exposure temperature to 3002°F (1650°C).

Notes: 1. PS series hoses are not suitable for hydrogen applications. For helium applications, please contact FITOK Group.
2. "Ordering Number Description" is a reference to understand the combination rules of FITOK product part number. Not all combinations are available.

Example: **SS-PS4-SAN4-M500**

SS: End connection material is 316 stainless steel.

PS4: PS series, hose inside diameter is 3/16".

SAN4: End connection 1 is 1/4" female JIC 37° flare swivel.
End connection 2 is 1/4" female JIC 37° flare swivel.

M500: Overall length is 500 mm.

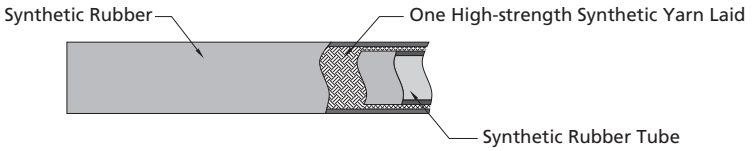
Connections are described based on the following rules:
1. Metric Tube Fitting - Fractional Tube Fitting - Metric Tube Adapters - Fractional Tube Adapters - NPT Threads - BSPT Threads - BSPP Threads - SAE/MS Parallel Threads - 37° Flare - Others
2. Put the sizes from the biggest down to the smallest if they are of the same type.
3. Put the female before male if they are of the same type and size.

Multipurpose Push-on Hoses

MP Series

Features

- Cover: weatherproof, abrasion withstanding and oil-resistant synthetic rubber
- Reinforcement: single-braid high-strength synthetic fiber woven for maximum strength and end connection retention
- Core tube: highly oil-resistant rubber
- Hose colors: blue, black, green, gray, red and yellow
- Working pressure up to: 300 psig (20.7 bar)
- Nominal hose size: 1/4" to 3/4"
- Working temperature: -40°F to 200°F (-40°C to 93°C)
- End connection materials: stainless steel and brass
- End connections reusable
- Custom length available



Hose Technical Parameters

Nominal Hose Size	Inside Diameter	Min. Inside Bend Radius	Temperature Range	Working Pressure at -40 to 70°F (-40 to 20°C)	Min. Burst Pressure at 70°F (20°C)

Thermoplastic Hoses

TH Series

Features

- Polyurethane cover: resists oil, weather and abrasion
- Reinforcement: double-braid high-strength synthetic fiber
- Core tube: nylon
- Working pressure up to: 5000 psig (345 bar)
- Nominal hose size: 3/16" to 1"
- Working temperature: -40°F to 200°F (-40°C to 93°C)
- End connections: 1/4 to 1 thread, 1/4" to 1" and 6 mm to 22 mm tube fitting
- End connection materials: stainless steel
- Custom length available

Technical Parameters

Thermoplastic Hydraulic Hose (SAE 100R7)

Example: **SS-TH4-FL4-NS4-F36-R7**
SS: End connection material is 316 stainless steel.
TH4: TH series, nominal hose size is 1/4"
FL4: End connection 1 is 1/4" tube fitting.
NS4 : End connection 2 is 1/4 male NPT.
F36 : Overall length is 36"
R7 : SAE J517 100R7.

Connections are described based on the following rules:
1. Metric Tube Fitting - Fractional Tube Fitting - Metric Tube Adapters - Fractional Tube Adapters - NPT Threads - BSPT Threads - BSPP Threads - SAE/MS Parallel Threads - 37° Flare - Others
2. Put the sizes from the biggest down to the smallest if they are of the same type.
3. Put the female before male if they are of the same type and size.

Hose Connectors and Sleeves

HC Series

Features

- Used to connect soft plastic or rubber tubing
- Working pressures and working temperatures are wider than those of the connected hoses
- Stainless steel or brass is available
- Shank design holds tubing inside diameter securely
- Hose connectors are reusable

Ordering Number Description

SS – HC – F4 – NS4

End Connection Material	Series	End Connection 1 Type	End Connection 1 Size	End Connection 2 Type	End 2 Connection Size
SS 316 SS	HC	F Fractional	4 1/4" or 4 mm	ML Metric Tube Fitting	4 1/4"
S4 304 SS		M Metric	6 3/8" or 6 mm	FL Fractional Tube Fitting	6 3/8" or 6 mm
A20 Alloy 20			8 1/2" or 8 mm	MT Metric Tube Adapter	8 1/2" or 8 mm
INC Alloy 600			10 5/8" or 10 mm	FT Fractional Tube Adapter	10 5/8" or 10 mm
HC Alloy C-276			12 3/4" or 12 mm	FNS Female NPT	12 3/4" or 12 mm
TI Titanium			16 1" or 16 mm	NS Male NPT	16 1" or 16 mm
AL Aluminum				FRT Female BSPT	18 M18 x 1.5
904L 904L SS				RT Male BSPT	20 M20 x 1.5
				FMS Female Metric Thread (for RG-M)	
				MS Male Metric Thread (for RG-M)	

Example: SS-HC-F4-FT6

SS: End connection material is 316 stainless steel.
HC: HC series.
F4: Hose ID is 1/4".
FT6: 3/8" tube adapter.

Note: "Ordering Number Description" is a reference to understand the combination rules of FITOK product part number. Not all combinations are available.
