Gap Inspection Gauges

Features

On initial installation of 6D tube fittings, the FITOK gap inspection gauge assures the installer or inspector that a fitting has been sufficiently tightened.

- ⦿ Sizes from 1/16" to 1" and 2 mm to 25 mm
- ⦿ Simple and consistent operation, applicable for all metal fittings

Individual sizes series (Fig.1)

These gauges can be used to inspect initial makeup on fittings installed from finger-tight or snug position.

The thicker end of the gauge is used for fittings installed from finger-tight position.

The thinner end of the gauge is used for fittings installed from snug position.

Multiple sizes series (Fig.2)

These gauges can be used to inspect initial makeup on fittings installed from finger-tight position.
